

Case Study :

Fundación Evolución

Interview with Marta Libedinsky, Academic Director

“We found the need to offer the same live trainings that were offered in our offices to educators all around the region”.

Marta Libedinsky, Academic Director

Which was the necessity that led you to use Wormhole?

Since Fundación Evolución has several **volunteers allocated in several provinces in the interior of the country as well as in other Latin American countries**, we found the need to offer the same live trainings that were offered in our offices to educators all around the region.

Some of the activities that we had to expand are trainings for teachers and tutors, collaborative projects between schools at the national and international level, web conferences cycles and meetings with provincial leaders of the Foundation.

How did you solve it?

We decided to implement online trainings with **Wormhole Classroom**. Now, we can transmit the **same training** for teachers and volunteers no matter where they are all **around the country or the region**, since we can interact with participants through chat or even give them audio and video permission to share experiences among all provincial leaders of the Foundation.

Customer: Fundación Evolución

Product: Wormhole Classroom

Area: Educational Foundation

Number of volunteers all around the country: 40

Provinces in which they act: 18

Website: www.fundacionevolucion.org.ar

Which benefits has your organization received from the use of Wormhole products?

Carrying out our trainings for teachers with Wormhole Classroom was really enriching, especially because of our vision which is based on **promoting learning and the use of ICTs in education**. With these classes, educators discovered a technology simple to use and they are all very happy about this experience.

Besides, it is very important for all **provincial leaders to be in contact with their peers from other jurisdictions** to share experiences that, despite some differences, are replicated along and across the country.

Likewise, thanks to the use of this platform, we have increased the visibility of our

organization, since many educators in all Latin America actively participate in our training proposals free of charge.

The Foundation designs and implements initiatives with national, regional and international scope in the following areas:

- Training and **support of educators and institutions** interested in the integration of ICTs to formal;
- Generation of virtual communities of learning and collaboration.
- Training of young women and men with the aim of developing technological skills to **learn and work**;
- Production, adaptation and localization of educational contents;
- Investigation of learning and teaching aspects with ICTs and the contexts in which they are developed;
- **Advice to entities and governments** for the implementation and evaluation of pedagogical initiatives of ICT integration.

About Wormhole

Creators of the first Live Learning platform, the simplest way to offer online classes and training.

Thousands of companies, educational institutions and nonprofit organizations daily choose it to provide classes and training through the Internet. It is focused on improving the interaction between people to create the most effective virtual environments of distance training.

Wormhole provides the best products to manage educational programs, create virtual campuses and strengthen the teacher-student relationship from any computer or mobile device.

Marta Libedinsky, Academic Director

About Fundación Evolución:

Fundación Evolución is an Argentine nonprofit organization which, since 1989, promotes the pedagogical integration of Information and communications technology (ICT) in educational environments.

Its vision is to **contribute to the improvement of the quality of teaching and learning through the reflexive and innovative use of ICTs**, with the aim of promoting the integral development of individuals.

Its mission is to position itself as an organization with presence in the entire country, being proactive in the generation of opportunities of collaborative, continuous and quality learning for everybody through avant-garde educational technologies.
